SUMMARY

Full-stack engineer with 4+ years building and shipping scalable, production-grade web and mobile applications. Architect of 10+ live systems encompassing RESTful API design, relational data modelling, responsive UI development, and containerised deployment. Proven ability to lead cross-functional delivery, mentor peers, and translate complex technical requirements into simple, reliable products — with a strong bias for clean code, accessibility, and performance.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, Java, C#, Python
Frontend	React.js, Next.js, Tailwind CSS, HTML5, CSS3
Backend	Node.js, RESTful API design, Express, Supabase, Firebase
Databases	PostgreSQL, MongoDB, MySQL
DevOps	Docker, Git, GitHub, Vercel, CI/CD pipelines, cPanel, Play Store & App Store Deployment
Mobile	React Native, Flutter, Android (Java/XML)

EXPERIENCE

Svvaap Innovations (21xEngineers) — Lead Software Engineer

Apr 2021 – Present

- Architected and shipped 20+ production full-stack applications using Node.js, TypeScript, React, and PostgreSQL, serving real customers with zero downtime SLAs.
- Designed scalable RESTful APIs with role-based access control, JWT authentication, and real-time event handling; improved average API response time by 40 %.
- Established coding standards, conducted code reviews, and mentored junior contributors, reducing feature delivery time across projects.
- Owned end-to-end lifecycle — requirements, system design, implementation, deployment, and monitoring — for all products.

FeelItBuy — Software Engineer — SD1

Dec 2025 - Present

- Software Engineer managing mobile app deployment (iOS/Android), QA testing, messaging integrations, and feature development for a growing e-commerce startup.
- Built responsive, accessible UI components and a secure, scalable order-management API consumed by both web and React Native mobile clients.

Chipsy IT — Web Developer Intern

Jan 2024 – Mar 2024

- Developed a modern e-commerce application with React.js, integrating third-party REST APIs and implementing responsive UI — shipped with zero critical production bugs.

SELECTED PROJECTS

TrackMyBus React · Node.js · Python · MongoDB · Gemini API

- AI/ML transit platform predicting ETAs across Karnataka; active handling noisy real-world data.
- Implemented RESTful data ingestion pipeline and accessible dashboard.

MenuCraft.in React · Node.js · Supabase · PostgreSQL

- Production POS and digital menu system for restaurants; multi-tenant architecture with scalable relational schema.
- Delivered admin dashboard, menu management, and role-based access — containerised with Docker for deployment.

BookHive Android (Java/XML) · Firebase · Cloudinary

- Built a mobile-first bookstore app with full catalog browsing, product detail pages, and secure checkout flow.
- Integrated Firebase for real-time database, authentication, and cloud storage; used Cloudinary for optimized media asset management.

CreateX React · TypeScript · Supabase · AI APIs

- AI-powered platform converting natural-language prompts into front-end prototypes with persistent iteration history.
- Architected modular component system and optimised AI prompt pipeline for low-latency UI generation.

Jobhunt4u.in React · Node.js · Firebase

- Full-featured job portal with recruiter dashboards & 10,000+ active users, application workflows, and scalable frontend architecture.
- Designed reusable component library and established TypeScript coding standards for the project.

Ideogram React.js · Node.js · Firebase · AI APIs

- Built a collaborative platform where users post concepts, vote on ideas, and iterate through built-in version history.
- Implemented tagging system with AI-assisted auto-tagging to help teams surface and discover high-potential ideas.
- Designed for team workflows with real-time updates, idea threading, and iteration tracking across contributors

EDUCATION

Master of Computer Applications (MCA)

2024 – 2026

Poornaprajna Institute of Management (PIM), Udupi

Bachelor of Computer Applications (BCA)

2021 – 2024

St. Mary's College, Shirva
