🌐 srujanmoolya.svvaap.in

OBJECTIVE

Passionate game developer with hands-on experience building 2D and 3D games in Unity and shipping published mobile titles. Currently sharpening my skills in C#, game physics, and AI behaviours while exploring modern game design patterns. I thrive in collaborative environments and am eager to learn, contribute, and grow alongside experienced developers.

EXPERIENCE

Game Designer Intern

Dec 2025 – Present

Khel.Fun (Web3 Gaming) · Remote

- Designed a production crypto game built on the Base network in collaboration with the founders.
- Created UI/UX flows, game mechanics, and pitch decks for the Zunno ecosystem..

Lead Software Engineer

Apr 2021 – Present

Svvaap Innovations (21xEngineers) · Remote

- Built and shipped 20+ production apps using Node.js, TypeScript, React & PostgreSQL. Handled everything — planning, design, build, deploy & monitoring.
- Developed MenuCraft.in, BizKit, CreateX, BookHive and Jobhunt4u.in from concept to production.

Software Engineer SD1

Dec 2025 – Present

FeelltBuy Innovations · Karkala

- Software Engineer managing mobile app deployment (iOS/Android), QA testing, messaging integrations, and feature development for a growing e-commerce startup.
- Built responsive, accessible UI components and a secure, scalable order-management API consumed by both web and React Native mobile clients.

GAME DEVELOPMENT PROJECTS

Animal Kingdom → [Watch Demo](#)

Stack: Unity, C#

- 3D third-person shooter with modular enemy AI using state machines for patrol, chase, and attack behaviours.
- Implemented procedurally generated levels to ensure fresh gameplay sessions and high replayability.
- Built a persistent progression system tracking player stats, unlocks, and achievements across sessions.
- Optimised rendering and memory usage for smooth performance on both mobile and desktop platforms.

NinjaKnights → [Watch Demo](#)

Stack: Unity, C#

- 2D action-platformer with tight melee combat mechanics, combo systems, and responsive controls.
- Designed spline-based level progression enabling smooth, curved paths and non-linear world layouts.
- Integrated a collectible system and leaderboard to drive short-session engagement and replayability.
- Focused on addictive loop design with fast restarts and increasing difficulty curves.

Car3D – Car Parkour Game → [Watch Demo](#)

Stack: Unity, C#

- Physics-driven driving game featuring parkour-style obstacle courses with precision vehicle handling.
- Built reusable vehicle component architecture supporting multiple collectible car types with drift mechanics.
- Implemented native input support and competitive leaderboard for score-chasing gameplay.
- Designed courses that blend platformer sensibility with realistic physics simulation.

Crazy Arcade [in Development] → [Play Now](#)

Stack: React Native

- Casual offline arcade game published on the Google Play Store.
- Delivered smooth gameplay on low-end Android devices through careful performance profiling.
- Designed for pick-up-and-play sessions with intuitive controls and no network dependency.

Arrow Puzzle – Maze Escape [in Development] → [Play Now](#)

Stack: React Native

- Designed increasingly complex maze levels to provide a satisfying difficulty ramp.
- Implemented offline-first architecture for seamless play without internet connectivity.

SKILLS

Game Engines	Unity (2D & 3D), Unreal engine 5
Languages	C#, Java, JavaScript, TypeScript, Python
Mobile Dev	React Native, Android studio java , Flutter
Web / Tools	React js , Next js , Tailwind CSS, PostgreSQL , MongoDB , Git
Game Design	Level Design, Game Loop Design, UI/UX for Games,....

EDUCATION

Master of Computer Applications (MCA) Poornaprajna Institute of Management · Udupi, Karnataka	2024 – 2026
Bachelor of Computer Applications (BCA) Mangalore University · Udupi, Karnataka	2021 – 2024
